/112 cont./

142 age the hair seldom becomes white. We met only one woman with slightly graying hair and an old man with a gray, sparse [302] beard, but dark hair. The beard among men is scant. The beard hair is regularly plucked (see Ills. 148 to 155 /see pp. 265-268/).

143 According to the blood-group analysis of the Paez, among the 303 individuals examined there were 88.78 per cent of blood group 0, 6.93 per cent of blood group A, and 4.29 per cent of blood group B. The blood group A+B is not represented (G. Arcila Velez, pp. 11-14).

129 The racial concept of Indian is foreign to the Paez themselves. To them "Indio" designates a cultural status. My colleague, Segundo Bernal Villa, an Indian from the region of Pasto, was designated as "blanco" because of his European clothing. And when our interpreter Victoriano bought himself "white clothing" (hat, pants, shirt, shoes) with the money he earned, he was called a "white" in his village and accordingly treated with hostility.

161 The population figures for the Paez do not seem either to increase or decrease, as far as the uncivilized Paez are con-
165 cerned, for example, in Calderas. Infant mortality comes to more
164 than 50 per cent. The most common cause of sickness is whooping cough. The health of children who survive their second year, as well as of adults, is -- considering the circumstances -- quite good. True, one scarcely sees old people over 60 (and [132] those who look that old are probably younger). The most fre-
[362] quent illness of adults is tuberculosis, which claims numerous victims, since the nights are very cold and the cold and wind can [262] penetrate through the light walls of the houses unhindered. More-
[273] over, no fat of any kind is commonly eaten. Another illness from which many Paez suffer, which, however, is not taken seriously, is stomach trouble caused by the drinking of brandy even during [154] infancy and the unsuitable diet in childhood. Infants are given [262] beans, cabbage, and yuca, but no milk, except mother's milk.

/120 cont./
the simplest possible form. Three rocks provide the lateral support or stand for the pots, of which there are two at most, a metal one, usually of aluminum, and an earthen one. Very poor families have only one earthen pot, which is relatively cheap to buy. The earthen pot cannot be hung up; it is set between the three fire-stones in such a way that it cannot tip over, whereas the aluminum pot is hung by its handle on a soot-covered, angled stick that hangs down from the ridge (Ill. 166 /see p. 273/). Above the fire area there hangs a frame made of maize canes and about one square meter in size, on which household utensils and, above all, the rock salt for salting food are stored, airy and dry. Tables, chairs, or stools of any kind are unknown. One generally sits on the hairy side of an untanned and hence board-stiff cowhide, on which one also /121/ sleeps, or one sits on a beam, a block of wood, or a stone. Paez who have seen house furnishings in Inzá or in the dwellings of white colonists have sometimes built for themselves as a bed a sort of bench 30-50 centimeters high, consisting of sticks or reeds laid side by side. For sleeping the customary cowhide is spread on it. These sleeping benches are not used for sitting.

The nights in Calderas are generally quite cool, and the light construction of the walls with cracks between the individual maize stalks does not in any way prevent the cold wind from coming in. In a few houses, near the sleeping area, I saw the walls sealed by means of expressed sugar-cane piled up horizontally. For sleeping, the members of the family lie down in a circle around the fire area, where the fire must be kept going all through the night. This, like all housework, is the task of the woman, who must gather sufficient fuel beforehand and get up every two hours during the night to stir up the fire. Furthermore, she must get up an hour earlier in the morning in order to have the first meal, which is eaten around five o'clock, sometimes even at four o'clock, prepared on time. In spite of this, the men think that they are the ones who do the hardest work and that basically they are the only ones in the village who really work.

584 father, and the latter distributes it /192/ to everyone and gives
43/ the bringer and all those present some of his own chicha to drink. This continues all night until everyone is drunk. In the morning the daughter-in-law, along with her father-in-law, goes back to the house of the latter, and from then on she lives with her husband until the wedding.

606 In case the father of the girl should not be satisfied with the
585 young man as a son-in-law, he would still not take any practical action against this union of his daughter, since he does not have to pay a dowry anyway. Besides, once children arrive, the
[591] parents are always satisfied. If, conversely, the father of the young man is not satisfied with the latter's choice of a bride, he may refuse him his house. In this case the young people customarily immediately build their own house, a small one at first.

58 The wedding generally does not take place very soon after courtship among the Paez, but only after a year or more. First of all there begins a trial period, which, however, has an altogether conjugal character. During this time of "trial marriage" the housekeeping abilities of the girl are to be tested, for the latter brings into marriage no dowry of any kind from her parents or any other possessions except her clothing. Since there are no social grounds for a choice of bride in the nonstratified Paez community, and no stimulus to marry on the grounds of a large dowry or on account of the possibility of a low bride price, there are no
581 child betrothals. As bride and wife a girl has only the merit of
462 her personality and her personal capabilities. The latter have the greater weight. It is required of a woman that she be able to cook and to weave the cloth for the whole family, that she not gossip, keep the house in order, and, above all, that she be able to keep the fire going at night and prepare the meal on time in
[264] the morning. The Paez are in the habit of having their first meal
[252] very early, at five or four o'clock in the morning, and an hour before that the woman must already begin preparing the food.
● [362] Moreover, as we have seen, the walls of the house are only made
[513] of maize stalks placed side by side, and give scarcely any protection against the coolness of the night. They therefore sleep lying
